

GRADE 9- SOCIAL SCIENCE

SECTION 1: HISTORY

Q1. Which of the following developments most directly contributed to the emergence of early urban civilizations?

- A. Complete dependence on hunting
- B. Agricultural surplus and organized settlements
- C. Abolition of trade
- D. Decline of technological knowledge

Q2. The development of writing in early civilizations was particularly important because it:

- A. Eliminated the need for agriculture
- B. Enabled record-keeping and administration
- C. Prevented the growth of cities
- D. Replaced all forms of oral communication

Q3. Which factor most likely strengthened the authority of rulers in early states?

- A. Absence of organized institutions
- B. Control over resources, administration and military power
- C. Complete equality of political power
- D. Decline of permanent settlements

Q4. Consider the following statements about early civilizations:

1. Agriculture encouraged permanent settlements.
2. Surplus production could support specialized occupations.
3. Urban societies had no need for systems of administration.

Which statement(s) is/are correct?

- A. 1 only
- B. 1 and 2 only

C. 2 and 3 only

D. 1, 2 and 3

Q5. Which of the following best explains why ancient trade networks contributed to cultural exchange?

A. Traders travelled only within their own villages.

B. Trade routes connected different regions and communities.

C. Trade prevented the movement of ideas.

D. Trade eliminated differences between civilizations.

Q6. In medieval societies, the relationship between land, political authority and social status was often significant because:

A. Land had no economic value.

B. Control of land could influence wealth and power.

C. All people possessed equal political authority.

D. Agricultural production was unnecessary.

Q7. Which of the following is an example of a primary historical source?

A. A modern school textbook

B. A historian's documentary made recently

C. An inscription created during the period being studied

D. A fictional novel about ancient history

Q8. A historian compares coins, inscriptions and literary records from the same period. The primary purpose is to:

A. Replace evidence with imagination

B. Cross-check information from different sources

C. Ignore differences between sources

D. Prove that all historical records are identical

Q9. Which development contributed to the expansion of long-distance trade between regions?

- A. Improved transport routes and commercial networks
- B. Complete isolation of settlements
- C. Prohibition of all marketplaces
- D. Disappearance of skilled craftsmen

Q10. The growth of national identities in the modern period was often connected with:

- A. Shared political ideas, culture and historical experiences
- B. The complete absence of communication
- C. The end of all political movements
- D. The rejection of every shared institution

Q11. Which statement best distinguishes a nation from a state?

- A. A nation always has no cultural identity.
- B. A state is a political organization with territory and governing institutions.
- C. A state cannot have laws.
- D. A nation and a state must always have exactly the same boundaries.

Q12. The spread of print culture contributed to the development of national consciousness by:

- A. Restricting the circulation of ideas
- B. Increasing access to shared discussions and information
- C. Ending literacy
- D. Preventing political debate

Q13. A historian argues that national identity develops through a combination of shared experiences and political developments. Which evidence would best support this argument?

- A. The existence of a single crop in a region
- B. The growth of shared symbols, movements and public institutions
- C. The absence of communication between communities

D. The complete disappearance of local traditions

Q14. Which of the following is the most appropriate way to interpret a historical event?

A. Study its causes, context and consequences.

B. Judge it only by modern assumptions.

C. Ignore evidence that contradicts a theory.

D. Assume that every historical change had one single cause.

Q15. Why do historians compare different interpretations of the same event?

A. All interpretations are automatically equally accurate.

B. Different interpretations can be examined against available evidence.

C. Evidence is irrelevant to historical study.

D. Historical events cannot be investigated.

SECTION 2: GEOGRAPHY

Q16. Which layer of the Earth is primarily composed of solid rock and includes the crust?

A. Atmosphere

B. Lithosphere

C. Hydrosphere

D. Biosphere

Q17. The movement of tectonic plates is primarily associated with:

A. Internal heat and processes within the Earth

B. Changes in the length of daylight

C. Daily variations in air pressure only

D. Ocean tides alone

Q18. Which statement best explains the relationship between the atmosphere and climate?

A. Climate is determined by one day's weather.

B. Climate describes long-term patterns of atmospheric conditions.

C. Weather and climate are completely unrelated.

D. Climate exists only in polar regions.

Q19. Which process involves the movement of water from the Earth's surface into the atmosphere?

A. Condensation

B. Precipitation

C. Evaporation

D. Infiltration

Q20. A region receives heavy rainfall on one side of a mountain and relatively little rainfall on the other side. This may be explained by:

A. Orographic effects and rain-shadow conditions

B. Earth's rotation stopping

C. Equal distribution of rainfall everywhere

D. Absence of atmospheric moisture

Q21. Which of the following is an example of a renewable natural resource when properly managed?

A. Coal

B. Petroleum

C. Solar energy

D. Natural gas

Q22. Deforestation on a large scale can contribute to:

A. Increased soil erosion and biodiversity loss

B. Permanent improvement in soil fertility

C. Complete elimination of floods

D. Unlimited groundwater recharge

Q23. Which statement correctly describes the biosphere?

- A. It includes only the solid interior of Earth.
- B. It is the zone where living organisms exist.
- C. It consists only of atmospheric gases.
- D. It includes only oceans and rivers.

Q24. A coastal area experiences moderate temperatures compared with an inland area at the same latitude. The most relevant factor is:

- A. The moderating influence of the sea
- B. The absence of solar radiation
- C. The complete absence of winds
- D. The Earth's uniform surface temperature

Q25. Sustainable management of natural resources primarily aims to:

- A. Maximize extraction without considering future needs
- B. Balance present use with long-term conservation
- C. Prevent all human use of resources
- D. Replace every natural ecosystem with cities

SECTION 3: POLITICAL SCIENCE

Q26. Which of the following is an essential feature of a democratic system?

- A. Political power is permanently inherited.
- B. Citizens have opportunities to participate in government.
- C. Elections are prohibited.
- D. Laws apply only to selected individuals.

Q27. The principle of universal adult franchise means:

- A. Only property owners can vote.

B. Eligible adult citizens have the right to vote without discrimination based on prohibited grounds.

C. Only government employees can vote.

D. Voting is restricted to one social group.

Q28. Why is the rule of law important in a democracy?

A. It allows authorities to act without legal limits.

B. It establishes that laws and legal procedures apply to people and institutions.

C. It removes the need for courts.

D. It makes constitutional rights unnecessary.

Q29. Which institution generally interprets laws and resolves legal disputes?

A. Judiciary

B. Legislature

C. Election campaign

D. Political party

Q30. A constitution primarily serves to:

A. Establish the framework of government and define powers and rights

B. Eliminate all government institutions

C. Prevent the creation of laws

D. Give unlimited authority to every individual

Q31. Which of the following is an example of accountability in government?

A. Public officials are not required to explain decisions.

B. Government institutions can be questioned through established legal and democratic mechanisms.

C. Elections are permanently suspended.

D. Public records are always prohibited.

Q32. Why are independent institutions important in a democracy?

- A. They can help limit arbitrary use of power.
- B. They eliminate the need for citizens.
- C. They ensure that every decision is made by one person.
- D. They prevent judicial review in all circumstances.

Q33. Which situation best illustrates the importance of fundamental rights?

- A. A government prohibits all public discussion.
- B. A citizen seeks legal protection against unlawful discrimination.
- C. A person is denied all legal remedies.
- D. A court refuses to consider constitutional principles.

Q34. The separation of powers is intended to:

- A. Concentrate all authority in one institution
- B. Distribute government powers and create checks on authority
- C. Eliminate the judiciary
- D. Prevent the legislature from making laws

Q35. Which of the following most directly supports meaningful democratic participation?

- A. Access to information and freedom to express opinions within the law
- B. Complete restriction of public debate
- C. Elimination of elections
- D. Prohibition of peaceful civic activities

SECTION 4: ECONOMICS

Q36. The central economic problem arises because:

- A. Human wants are limited.
- B. Resources are scarce in relation to human wants.

C. All resources are unlimited.

D. Production requires no choices.

Q37. Opportunity cost refers to:

A. The total money earned from a decision

B. The next best alternative forgone when a choice is made

C. The price of every product in a market

D. The total amount of resources available

Q38. Which of the following is an example of human capital?

A. A machine

B. A building

C. Education and skills acquired by a worker

D. A natural forest

Q39. When the price of a product increases, demand may decrease, other factors remaining constant. This relationship is generally explained by:

A. The law of demand

B. The law of supply only

C. The principle of unlimited resources

D. The absence of consumer choices

Q40. Which of the following is a function of money?

A. Medium of exchange

B. Elimination of scarcity

C. Guarantee of equal income

D. Prevention of all economic activity

Q41. Inflation generally refers to:

A. A sustained rise in the general price level

B. A fall in the quantity of money only

C. A permanent decline in all prices

D. An increase in the physical size of products

Q42. Which of the following is most likely to increase productivity?

A. Improved skills and appropriate technology

B. Reduction in all forms of training

C. Destruction of productive equipment

D. Elimination of workplace organization

Q43. A family creates a monthly budget mainly to:

A. Avoid making financial decisions

B. Plan income, expenditure and savings

C. Guarantee unlimited income

D. Eliminate all unexpected expenses

Q44. Which situation best illustrates the concept of financial planning?

A. Spending all income without considering future needs

B. Allocating income among essential expenses, savings and other goals

C. Borrowing money without considering repayment

D. Ignoring available financial information

Q45. Why is access to education considered important for economic development?

A. It can improve skills, productivity and employment opportunities.

B. It guarantees identical income for everyone.

C. It eliminates the need for all natural resources.

D. It prevents technological progress.

SECTION 5: ACHIEVERS SECTION

Q46. An archaeologist discovers evidence of agricultural settlements, storage facilities and specialized craft production. Which conclusion is most strongly supported by this evidence?

- A. The community depended exclusively on hunting.
- B. Agricultural surplus may have supported occupational specialization and social organization.
- C. The settlement had no form of economic activity.
- D. The community could not have developed trade networks.

Q47. A region experiences rapid deforestation, followed by increased surface runoff and soil erosion during heavy rainfall. Which explanation best connects these processes?

- A. Loss of vegetation can reduce soil protection and increase runoff.
- B. Deforestation always increases groundwater recharge.
- C. Vegetation has no relationship with soil erosion.
- D. Heavy rainfall cannot affect areas with reduced vegetation.

Q48. A government introduces a law, but citizens argue that the law violates constitutional rights. Which institutional mechanism is most relevant for examining this issue?

- A. Judicial review, where constitutionally authorized courts examine the validity of laws
- B. The automatic cancellation of all laws
- C. The removal of all legislative institutions
- D. The prohibition of constitutional interpretation

Q49. A student has ₹500 and must choose between purchasing a reference book and attending a recreational event. The student chooses the book.

Which statement best explains the economic concept involved?

- A. The student faces scarcity and makes a choice involving opportunity cost.
- B. The student has eliminated all future economic choices.
- C. The student has unlimited resources.
- D. The student has no alternative use for money.

Q50. A growing city experiences increased demand for water, housing and employment. Its administration plans to expand infrastructure while protecting nearby natural resources.

Which approach best reflects sustainable development?

- A. Expand economic activity without considering environmental effects.
- B. Stop all economic development permanently.
- C. Balance economic needs, social well-being and environmental protection.
- D. Use all natural resources immediately to maximize short-term output.
